L.O: To understand the different meaning and correct use of near homophones

Near Homophones

A **near homophone** is a word which is pronounced *almost* the same as another word but has a different spelling and meaning. It is not the same as an actual **homophone**, which is a word that's pronounced the same as another word but has a different spelling and meaning.

Precede	Proceed
Accept	Except
Descent	Dissent
Wary	Weary
Further	Father

HOWEVER....there are near homophones that we use in our writing all the time. I have used two already....and I just used another...

There
